Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 14 of claim 1, "said lower layer" lacks antecedent basis. In line 1 of claim 1, the phrase "type" should be deleted so that the field emission electron source is claimed and not other un-described sources. See MPEP § 2173.05(d).

Claims 2-18 are indefinite for the same reasons since by their dependencies, it incorporate the same deficiency as their parent claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ichihara et al (EP 1 094485 A2).

Regarding claims 1-2, Ichihara discloses a field emission electron source (see figure 1) comprising an insulative substrate (11), an electron source element (combination of 8, 9, 3, 6, and 7) having a lower electrode (8), an amorphous buffer layer (3) having greater resistance than polycrystalline silicon, a strong drift layer (6)

Art Unit: 2879

including polycrystalline silicon, and a surface electrode (7). Please see Paragraphs 14, 15, 21, 56, 74, and 90.
